

Wide Fit Shoes Men's measuring advice

This is a guide only. To ensure correct fitting footwear seek professional shoe fitting advice.

Instructions – When measuring your feet please remember to wear the socks/hosiery you would normally, wear for this type of footwear.

To measure length

1. Place the measuring chart (see page 2 and 3) against a wall (or other vertical object) so that point A on the chart is touching the wall and place your foot as shown above
2. You will need a flexible tape measure

To measure width

3. As shown in the diagram above this is the ball of your foot, measure completely around your foot
4. Follow this measurement to the arch of the foot and on the top you will feel a bone, measure completely around the arch to the bone

Size	1E Wide	EE Extra Wide	4E Extra Wide & Extra Deep	6E Extra Wide Extra Deep Plus
6	234	238	256	264
7	240	244	262	270
8	246	250	268	276
9	252	256	274	282
10	258	262	280	288
11	264	268	286	294
12	270	274	292	300
13	–	280	289	306
14	–	286	–	–

To find your fitting

- Find your size on the left hand column of the table eg. **size 8**
- Then move across the table until you find the square which is higher than your width measurement
- Eg. if you measured size 8 and width 262mm, your size fitting would be **8, Extra Wide, Extra Fitting.**

To get the correct measurement ensure that your weight is fully on the foot and against a wall

www.widefitshoes.co.uk

← The distance between these two points must be exactly 277mm to ensure the chart is the correct size. Make sure to check with a ruler or tape measure. Cut along the dotted line of this page. If the measurement prints out less DO NOT proceed with a fitting as the measurement will be incorrect. Please refer to the green box below. →

This is a guide only. To ensure correct fitting footwear seek professional shoe fitting advice. **Instructions Below**

1. Print page 2 and 3 of this document on A4 paper.
2. In the Print Dialog window, page scaling must be set to 'none'. If 'reduce to fit' is selected the chart will be printed out smaller, resulting in incorrect measurements
3. Cut along the dotted lines at the bottom of this page, including the top and bottom of page 3
4. Join together with adhesive tape the bottom of this page with the top of page 3. The ends of each page must join exactly together, if they overlap the chart will incorrect
5. You now have a correctly sized measuring chart. Please follow the instruction on page 1 and measure your feet

Cut along the dotted line

The distance between these two points must be exactly 277mm to ensure the chart is the correct size. Make sure to check with a ruler or tape measure. Cut along the dotted line of this page. If the measurement prints out less **DO NOT** proceed with a fitting as the measurement will be incorrect. Please refer to the green box below.

Cut along the dotted line
